American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

X Increase lending or reduce lending less than otherwise would have occu	rred.
--	-------

The proceeds from the CPP have been used to fund the operations of the Bank. The operations supported by CPP funds primarily include the continuation of the Bank's lending, deposit gathering, and community investment activities.

X To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).

The CPP funds have supported the Bank's fulfillment of its chartered mission of serving the borrowing needs of our local markets. Major lending initiatives have been focused on residential mortgage lending and small business lending.

¹If repayment was incremental, please enter the most recent repayment date.

1st Financial Services Corporation / Mountain 1st Bank & Trust Company

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?
Without the purchase of preferred stock through the CPP and given the extreme disruption in the private equity markets, the likely alternative for the Corporation and the Bank would have been to aggressively curtail lending activities even further reduce existing portfolio levels. However, as a result of the purchase of preferred stock via CPP, we have been able to continue lending and investment in our local communities. Toward that end, the Corporation's board of directors approved a strategic addition to our existing business plan in early 2009, to expand our small business lending via the recruitment of several SBA and USDA loan production specialists. As the SBA leading lender headquartered in western North Carolina, we believe this newer business line has allowed us to leverage our small business lending expertise and extend an estimated \$20.8 million in new SBA and USDA loans to small businesses in 2010.

What actions were you able to take that you may not have taken without the capital infusion of CPP/CDCI funds?
The CPP funds made it possible through September 30, 2009, for both the Corporation and the Bank to maintain regulatory capital at or
above "well capitalized" thresholds with both the FDIC and the Federal Reserve Bank of Richmond, our primary federal banking regulators,
and continue to serve our communities' lending and depository needs without curtailment. Principally due to the increase in reserves for
nonperforming loans in the fourth quarter of 2009, the Bank was categorized as "adequately capitalized" under the regulatory framework for
prompt corrective action as of year-end 2010. The Bank has been able to maintain it "adequately capitalized" classification through March
31, 2011, through the equity provided by the CPP funds. During 2010, CPP funds supported the fulfillment of the Bank's chartered mission of
serving the borrowing needs of our local markets via the origination of 1,179 new loans amounting to approximately \$231 million, consisting
primarily of 1-4 family residential mortgage and construction loans of \$157 million, consumer loans of \$2 million, and USDA and SBA loans of
\$21 million. The sale of approximately \$115 million of 1-4 family residential mortgage loan originations on the secondary market further
enabled the Bank to have the resources to serve the needs of additional individuals and businesses. The Bank supports the depository needs
of the communities we serve as evidenced by an increase of \$34.6 million, or 13.4%, in core deposits. The Bank also developed several special
residential mortgage programs to assist service workers and medical practitioners in purchasing homes, whereby they otherwise would have
been unable to fulfill their dreams of home ownership. The Bank also worked with delinquent residential borrowers to avoid foreclosure,
helping people stay in their primary residences.
